

System Design Specification (SDS)

Project: Web Crawl, Accessibility & Compliance Monitoring System

Author: Sarthak Mishra

Version: v1.0

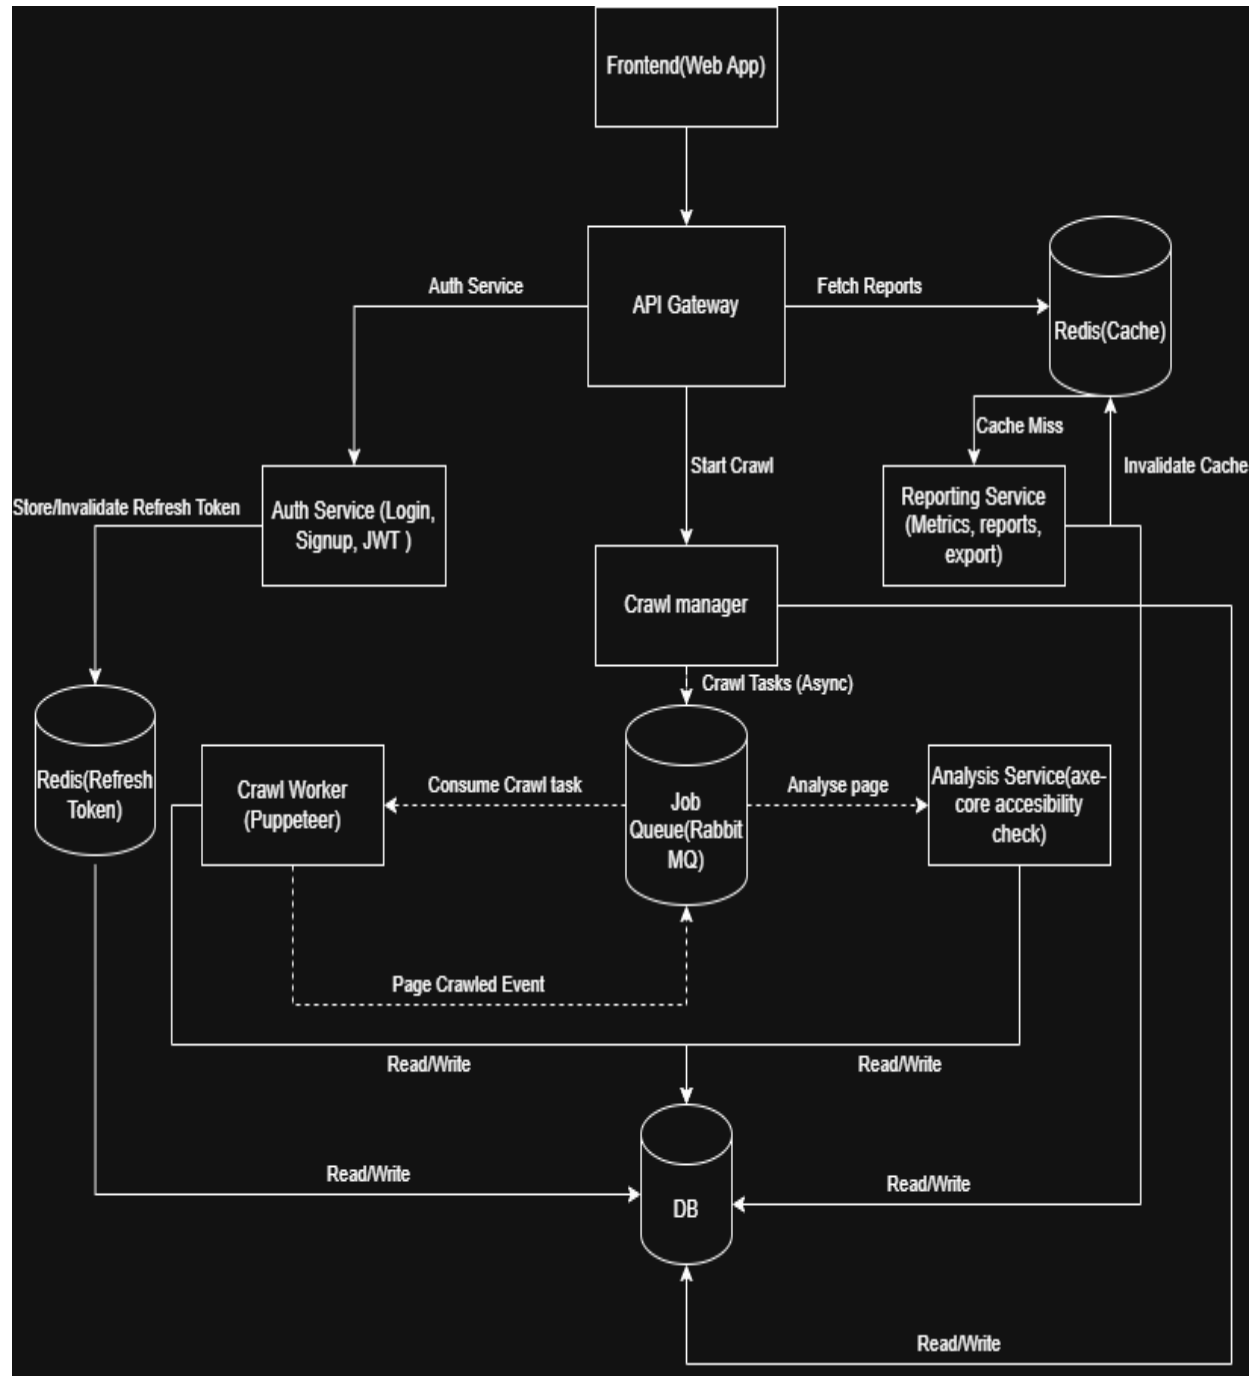

Date: 10-02-2026

Status: Draft

1. TECH STACK

Layer	Technology	Why
Frontend	React.js	To build UI for the app
Backend	Express.js with TypeScript	To create APIs on top of Node.js
Database	PostgreSQL	To store data of various services and users in the application.
Caching	Redis	To reduce the load on database and servers
Web Crawling	Puppeteer	To fetch the DOM information of the specified URL.
Job Queue	RabbitMQ	For asynchronous communication between services
Accessibility Analysis	Axe-core	For accessibility testing of websites.

2. SYSTEM ARCHITECTURE

Database Design
